What sort of teaching allows students to take ownership of their own learning?

What will motivate and excite children's curiosity and haul them out of passivity?

What style of teaching will develop their intellectual skills to the point that they can become effective agents of enquiry in any field?

Become a Thinking School with **INTELLIGENT LEARNING**

Written and presented By Steve Williams
Acclaimed by the NUT

Intelligent Learning is a teaching practice course, executed through six half hour video sessions, which address in detail the changes in pedagogy you and your school need to introduce to start addressing the issues of motivation and becoming a thinking and learning community.

The central theme of the course is to give students the skills to ask more and searching questions. ...it's the questioning skills, not of the teacher but of the student that really count in developing their cognitive abilities and engagement.

Their questions dominate the learning agenda and the ownership of learning follows.

At the end of the course teachers will have the skills and practical strategies to:

- facilitate more and more sophisticated student questioning
- support children in using concepts to organise their thinking
- manage dialogue and discussion to develop children's ideas
- plan lessons and study programmes that promotes questioning and dialogue
- create communities of inquiry in their classroom

"Intelligent Learning is a complete DVD training course for promoting independent learning, curiosity, good dialogue and thinking skills in your school at Key Stages 2 and 3".

Debra Kidd and Rebecca Patterson -
Manchester Metropolitan University

In the pack are:

- Six half hour videos on DVD
- Supporting guides for each video, written by programme users in schools themselves
- A CD of supporting articles and materials to stimulate professional development and curriculum design
